

# HOW TO CLEAN BASEBALL PANTS

Low cost method!

SUPPLIES NEEDED: KITCHEN SPONGE & FELS NAPHTHA SOAP

## STEP 1:

Rinse the pants to remove any loose dirt.

## STEP 2:

Wet the sponge and add some of the soap bar onto the side of a sponge with the textured surface and begin scrubbing the fabric. Concentrate on one section of the pants at a time.

## STEP 3:

Continue to work the fabric in sections until I've gotten all the stains out. Rinse the pants and wash them in the washing machine on a regular cycle.

## STEP 4:

Hang the pants to dry. (Placing them in a heated dryer might set the stains if you did not remove all of them.)

## STEP 5:

If any stains remain, repeat the process or try one of the alternate cleaning options.
